Subject: Welcome to the DoD IATAC SME Program

Mr. Henderson,

Your application to the DoD Information Assurance Technology Analysis Center's Subject Matter Expert (SME) program has been accepted. I just wanted to take this opportunity to thank you for volunteering to be part of our program.

The purpose of the IATAC SME program is to promote collaboration among experts in Information Assurance across Government, Industry, and Academia. Our SMEs serve as a resource to IATAC's core operations and the DoD community. Most notably, IATAC calls upon its SMEs for assistance when our technical analysts need additional insight into a certain subject matter in order to accurately answer one of the many technical inquiries IATAC receives. We also call upon SMEs to volunteer papers and/or articles for our premiere publication, the IA newsletter. I have attached the Article Submission Instructions for our upcoming edition should you choose to author an article in the future. Please do not focus on the due date; we are always accepting articles for current and future editions of the newsletter.

Additionally, we ask all our SMEs to share, at any time, Scientific and Technical Information which would be beneficial knowledge to our Information Assurance/Information Operations Community.

As the SME Program Coordinator, please feel free to contact me directly if you have any questions or suggestions. I look forward to working with you.

Regards,

Kristin E. Evans
